Summary

React Native Developer with 2+ years of experience building and deploying cross-platform mobile applications for Android and iOS. Strong experience in React Native, JavaScript, TypeScript, Redux, REST APIs, GraphQL, Realm, payment integrations, analytics, deep linking, push notifications, and mobile app deployment. Experienced in component architecture, state synchronization, offline-first architecture, performance optimization, crash monitoring, SDK integration, and production release management for large-scale e-commerce and enterprise applications.

Technical Skills

- **Mobile Development:** React Native, Android, iOS, React Native CLI, Expo, Mobile App Deployment
- **Programming Languages:** JavaScript, TypeScript
- **Architecture & State:** Component Architecture, Code Architecture, Redux, Context API, Realm, Offline-First Architecture, State Synchronization, Data Synchronization
- **APIs & Integration:** REST APIs, GraphQL, API Integration, SDK Integration, Firebase
- **Payments:** Razorpay, Juspay, JioVault, AJIO Wallet
- **Analytics & Monitoring:** CleverTap, Amplitude, AppsFlyer, Firebase Analytics, Firebase Crashlytics, Push Notifications
- **Mobile Features:** Deep Linking, Maps, Search, QR Codes, Notifications, Google Services, Localization
- **Quality & Delivery:** Debugging, Testing, Crash Monitoring, Performance Optimization, CI/CD, Release Management
- **Tools:** Git, GitHub, Jira, Postman, Xcode, Android Studio, VS Code, Firebase Console

Experience

Associate Engineer — Successive Digital

April 2024 – Present

- Developed and deployed cross-platform mobile applications for Android and iOS, contributing to production features across large-scale e-commerce and enterprise products.
- Designed and implemented reusable component architecture and modular code architecture for scalable applications, improving code maintainability and development consistency.
- Integrated REST APIs, payment services, third-party SDKs, deep linking, push notifications, maps, Google services, and Firebase services into production applications.
- Implemented offline-first functionality using Realm with state synchronization and data synchronization workflows, contributing to approximately 30% improvement in application performance.
- Integrated Firebase Analytics and Firebase Crashlytics for user-event tracking, crash monitoring, issue diagnosis, and production stability analysis.
- Optimized application performance, rendering, and responsiveness across production features, contributing to improved user experience and faster mobile workflows.
- Contributed to CI/CD workflows, SDK upgrades, testing, debugging, release validation, and production issue resolution, reducing release turnaround time by approximately 25%.

Trainee Engineer — Successive Digital

October 2023 – April 2024

- Completed hands-on React Native training covering JavaScript, TypeScript, component architecture, state management, API integration, debugging, and production development practices.
- Developed reusable components and application modules for Android and iOS applications following modular code architecture principles.
- Supported API integration, SDK integration, Firebase integration, debugging, testing, and mobile application deployment activities.

Projects

AJIO — Mobile Developer

Google Play

- Contributed to AJIO's large-scale e-commerce platform across product discovery, search, product details, wishlist, cart, checkout, payments, order management, and post-purchase workflows.
- Developed and integrated payment capabilities including AJIO Wallet, gift cards, saved cards, bank offers, JioVault, Juspay, and JioPay, handling multiple payment flows and third-party SDK integrations.
- Implemented end-to-end customer journey and event tracking using CleverTap, Amplitude, AppsFlyer, and Firebase Analytics across key user actions and commerce workflows.
- Integrated Firebase Crashlytics for production crash monitoring and issue diagnosis, while contributing to debugging, stability improvements, and release validation.

- Worked on order tracking, returns and exchanges, refunds, notifications, deep linking, recommendations, search enhancements, and other customer-facing features.

SHEIN India — Mobile Developer

App Store

- Contributed to SHEIN India's production fashion e-commerce platform, working across customer-facing experiences and reusable application modules.
- Developed reusable UI components using component-based architecture and modular code patterns for scalable Android and iOS development.
- Integrated REST APIs and application services to support product, user, and commerce-related workflows while handling asynchronous data and state synchronization.
- Optimized application performance, rendering, and screen responsiveness while using debugging and monitoring tools to identify and resolve production issues.

GoTo Pass — Mobile Developer

Google Play

- Developed features for a membership platform enabling users to discover hotels and facilities through filters, categories, and map-based search.
- Implemented reservation workflows allowing members to search facilities, create bookings, and view upcoming and past reservations through API-driven flows.
- Built digital QR membership cards, points history, coupons, membership benefits, and member-related features to support digital membership and engagement.
- Delivered customer-facing features including news, promotions, messages, FAQs, profile management, notifications, multilingual support, and synchronized application state.

Nexo — Mobile Developer

Demo

- Built an offline-first kiosk management application using Realm, enabling business operations to continue reliably during limited or unavailable network connectivity.
- Developed sales tracking, inventory management, kiosk operations, and reporting features to support day-to-day business workflows.
- Implemented local data persistence, state synchronization, and data synchronization workflows to maintain consistency between offline and online states.
- Designed reusable components and handled API integration, synchronization, debugging, and production-oriented feature development.

Education

B.Tech in Computer Science and Engineering — Maharaja Surajmal Institute of Technology (GGSIPU)
CGPA: 9.42

12th — Science, RPVV

91.83%
